

Subject Index to Volume 16

A

- Acetylcholine, cholinergic stimulation, eccrine sweat glands, C228
- Acidification, single skin (frog), C506
- Actin, synthesis, muscle, during immobilization, C39
- Adenosine monophosphate, cyclic dibutyl, pyruvate oxidation, heart, C45
- enzyme levels, myotubes, C33
- epithelial cells, tracheal, C441
- localization of, trachea, C327
- Adenosine triphosphatase, measurement, micromethodology for, kidney tubules, C314
- Adenosine triphosphate, RNA degradation and, reticulocytes, C390
- Adenylate cyclase, β -adrenergic receptor and, trachealis muscle, C325
- ADH: see Antidiuretic hormone
- Adipose tissue, protein turnover in, regulation by glucose, insulin, and amino acids, C228
- β -Adrenergic agonist
 - localization of adenosine monophosphate, cyclic, trachea, C327
 - physiological responsiveness, tracheal epithelial cells, C441
- β -Adrenergic receptor: see Receptors
- Aequorin, cells, measurement of cytosolic free calcium, C396
- Aging, neuromuscular transmission and, C288
- Airway
 - β -adrenergic receptor in, trachea, C335
 - small, postnatal development, C197
- Albumin, uptake of metabolism, yolk sac placenta, C409
- Alkaline, shifts, activation-induced, hydrogen equivalents and, muscle (frog), C357
- Alveolar cells, type II, insulin binding and glucose transport, C472
- Amiloride
 - potassium secretion and, colon (turtle), C26
 - sodium-hydrogen exchange, platelets and leukocytes, C293
- Amino acids
 - large neutral transporter, brain, diabetes, C450
 - protein turnover and, adipose tissue, C228
 - starvation, fibroblasts from muscular dystrophy, C415
- Amphotericin B, potassium and sodium-potassium flux ratio, corneal epithelium (frog), C454
- Anaerobic metabolism, lactate efflux, pH effects, sartorius muscle (frog), C175
- Angiotensin-converting enzyme, activity, hormonal influences on, endothelial cell, C163
- Angiotensin II
 - levels, neuronal cultures, C115
 - receptors: see Receptors
- Anions
 - exchange
 - leukemic cell lines, C53
 - proton-sulfate cotransport, erythrocytes, C247

- organic, transport system, proximal tubule, C217
- Anococcygeus muscle, oxidative metabolism and contractility, separation from aerobic glycolysis, C342
- Anoxia, RNA degradation and, reticulocytes, C390
- Antidiuretic hormone: see also Vasopressin
 - bladder, electron-microscopic study, C268
 - stimulation and washout, aggregate-carrying membrane, bladder (toad), C90
- Antigen-antibody interaction, heteroimmune antisera and sodium pump, erythrocytes (sheep), C120
- Aorta, glycolysis regulation, C107
- ATP: see Adenosine triphosphate
- ATPase: see Adenosine triphosphatase; Magnesium ATPase; Sodium-potassium-ATPase

B

- Barium, perilymphatic perfusion, potassium permeability and, cochlear duct, C240
- Basolateral membrane, chloride movement across, gallbladder epithelium (frog), C495
- Biomechanical systems, measurement, optical scanning system, C488
- Bladder: see Gallbladder; Urinary bladder
- Blood-brain barrier, tyrosine and leucine uptake, diabetes, C450
- Brain
 - diabetic, tyrosine and leucine uptake, C450
 - hypertensive, neuronal cultures from, increased angiotensin II receptors in, C364
 - membranes, spectrin-like protein from (mouse), C61
 - normotensive and hypertensive, angiotensin II in neuronal cultures from, C115
- Brain cell, hypertensive, increased angiotensin II receptors in, C364
- Bronchiolitis, postnatal development, bronchiolar Clara cells, C197

C

- Cadmium, calcium uptake and, red blood cells, C143
- Caffeine, alkaline shifts, hydrogen equivalents and, muscle (frog), C357
- Calcium
 - β -adrenergic sweat secretion and, sweat glands (horse, donkey), C10
 - cytosolic free, measurement of, cells with aequorin, C396
 - extracellular, cobalt inhibition of prolactin secretion and, intracellular locus, C150
 - platelet-derived growth factor, vascular smooth muscle cells, C501
 - prostaglandin interaction, tracheal mucosa, C182
 - release, vasopressin stimulation of, Swiss 3314 cells, C156

- uptake, cadmium and zinc effects, red blood cells, C143
- Calcium-45, uptake, cobalt inhibition of prolactin secretion and, intracellular locus, C150
- Calcium ions
 - flux, vasopressin effects, Swiss 3T3 cells, C156
 - inotropism and pyruvate dehydrogenase, perfused heart, C45
- Canavanine, ouabain sensitivity, fibroblasts from muscular dystrophy, C415
- Carbohydrates
 - content, thyroid hormone effects, sodium-potassium-ATPase, C282
 - metabolism, aorta, C107
- Carbon dioxide, intracellular pH, single skin (frog), C506
- Carcinoma, colonic, epithelial properties, C260
- Carotid artery, glucose uptake (pig), C433
- Catecholamines, increased receptors, neuronal cultures, hypertensive brain, C364
- Cell: see also specific type and site
 - freezing, C125
 - physiology, traditions and new trends, C1
- Cell line, leukemic, chloride transport, C53
- Cell membrane, freezing injury and, C125
- Cell surface, Novikoff, solute-excluded volumes, C350
- Chloride
 - movement, basolateral membrane, gallbladder epithelium (frog), C495
 - secretion, tracheal mucosa, C182
 - transport, leukemic cell lines, C53
- Chloride ions, abnormal, sweating in cystic fibrosis, C3
- Cholinergic stimulation, guanosine monophosphate, cyclic accumulation during, eccrine sweat glands, C228
- Chromatography, high-performance liquid, angiotensin II in neuronal cultures, C115
- Ciliary activity, stimulation of, palate epithelium (frog), C299
- Circulation, membrane, bladder (toad), C90
- Clara cells, bronchiolar, postnatal development, C197
- Cobalt ion, prolactin secretion and, intracellular locus, C150
- Cochlear duct, perilymphatic perfusion of barium, potassium permeability and, C240
- Coenzyme A, synthesis, heart, C99
- Colon
 - carcinoma, epithelial properties, C260
 - potassium transport, membrane potential and (turtle), C26
- Compartmentation, creatine kinase, myofibrillar, C424
- Connective tissue, gallbladder epithelium, chloride transport (frog), C495
- Corneal epithelium, potassium and sodium-potassium flux ratio, amphotericin B-induced (frog), C454
- Coupling, sodium-sugar, stoichiometry, intestinal cells (chick), C74

Creatine kinase, energy shuttle, myofibrillar end, C424
 Cryobiology, freezing of living cells, C125
 Cryopreservation, granulocytes, osmotic tolerance, C373
 Cryoprotectant, freezing of living cells, C125
 Cysteine, protein and coenzyme A synthesis and, heart, C99
 Cystic fibrosis, sweating in, abnormal chloride ions and, C3

D

Deoxyribonucleic acid, synthesis, kidney epithelial cells, potassium stimulation (monkey), C14
 Development: *see also* Growth postnatal, bronchiolar Clara cell, C197
 Dexamethasone, angiotensin-converting enzyme activity and, endothelial cell, C163
 Diabetes, tyrosine and leucine uptake, brain, C450
 Diffusion coefficient, mitochondrial clustering effects, oxygen supply, hepatocytes, C83
 α -(Difluoromethyl)-alanine/methyl ester, intracellular pH, single skin (frog), C506
 4,4'-Diisothiocyanostilbene-2,2'-disulfonic acid, chloride transport, leukemic cell lines, C53
 DNA: *see* Deoxyribonucleic acid
 Dye, cell-to-cell movement, mammary gland, during lactation (mouse), C20

E

Eccrine sweat gland: *see* Sweat glands
 Editorial, traditions and new trends in cell physiology, C1
 Electrical parameters, epithelial properties, colonic carcinoma, C260
 Electron Microscopy: *see* Microscopy
 Electrolytes, transport, sweat ducts, cystic fibrosis, C3
 Embryo, yolk sac placenta, metabolism of transferrin and albumin, C409
 Endothelial cell, angiotensin-converting enzyme activity, hormonal influences on, C163
 Energy
 dependence, RNA degradation, reticulocytes, C390
 shuttle, creatine phosphate, myofibrillar end, C424
 Enzymes: *see also* specific enzyme regulation, hormonal influences, endothelial cell, C163
 Epithelial cells
 ciliated, adenosine monophosphate, cyclic, trachea, C327
 renal, growth regulation, sodium effects (monkey), C321
 tracheal, physiological responsiveness, C441
 Erythrocytes
 calcium uptake, cadmium and zinc effects, C143
 proton-sulfate cotransport, C247
 sodium-potassium pump in, heteroimmune antisera in (sheep), C120
 spectrin-like protein, brain membranes (mouse), C61

F

Fat pad, epididymal, regulation of protein turnover, C228
 Feeding, undernutrition, postnatal development of bronchiolar Clara cells, C197
 Fever, endogenous pyrogen-induced, muramyl dipeptide derivative effects, C169
 Fibroblasts, increased ouabain sensitivity, muscular dystrophy, C415
 Freezing: *see* Cryopreservation
 Fumarase, levels, adenosine monophosphate, cyclic, effects, myotubes, C33
 Furosemide, chloride transport, leukemic cell lines, C53

G

Gallbladder, epithelium, basolateral membrane, chloride movement across (frog), C495
 Gastrocnemius muscle, myosin light chain phosphorylation, C462
 Glucagon, bronchiolar Clara cells, postnatal development, C197
 Glucose
 aerobic glycolysis, anococcygeus muscle, C342
 metabolism, aorta, C107
 protein turnover and, adipose tissue, C228
 transport, alveolar type II cells, C472
 uptake, carotid artery (pig), C433
 Glyceraldehyde-3-phosphate dehydrogenase, growth regulation, kidney epithelial cells (monkey), C321
 Glycerol, toxic and osmotic effects, granulocytes, C382
 Glycolysis
 aerobic, separation from oxidative metabolism, anococcygeus muscle, C342
 carotid artery, sodium-potassium transport relations (pig), C433
 regulation, aorta, C107
 Glycopeptides, glycolytic, endogenous pyrogen-induced fever and, C169
 Granulocytes
 glycerol effects, C382
 osmotic tolerance, C373
 Growth: *see also* Development control, vasopressin effects on calcium release, Swiss 3T3 cells, C156
 DNA synthesis, potassium effects, kidney epithelial cells (monkey), C14
 regulation, kidney epithelial cells, sodium effects (monkey), C321
 Growth factor, platelet-derived, sodium ion influx and, vascular smooth muscle cells, C501
 Guanosine monophosphate, cyclic, accumulation, cholinergic stimulation, eccrine sweat glands, C234

H

Heart
 protein and coenzyme A synthesis, cysteine effects, C99
 working, pyruvate oxidation, calcium ion dependence, C45
 Hepatocytes, oxygen supply, mitochondrial clustering effects, C83
 Hepatoma, Novikoff, solute-excluded volumes, C350

Heteroimmune antisera, sodium-potassium pump and, erythrocytes (sheep), C120
 Histidinol, ouabain sensitivity and, fibroblasts from muscular dystrophy, C415
 Hormonal influences, angiotensin-converting enzyme activity, endothelial cell, C163
 Hydrogen equivalents, transport, activation-induced alkaline shifts, muscle (frog), C357
 Hypertension
 brain
 angiotensin II levels in, C115
 neuronal cultures from, increased angiotensin II receptors in, C364
 Hypoxia, mitochondrial clustering effects, oxygen supply, hepatocytes, C83

I

Immunoadjuvants, synthetic, endogenous pyrogen-induced fever and, C169
 Immunocytochemistry, localization of adenosine monophosphate, cyclic, trachea, C327
 Inotropy, intracellular sodium ion activity during, Purkinje fibers, C478
 Insulin
 angiotensin-converting enzyme activity and, endothelial cell, C163
 binding, alveolar type II cells, C472
 protein turnover and, adipose tissue, C228
 Intestinal cells, sodium-sugar coupling stoichiometry (chick), C74
 Ionophore A23187
 guanosine monophosphate, cyclic accumulation and, eccrine sweat glands, C228
 platelet-derived growth factor and, vascular smooth muscle cells, C501
 Ions
 transport
 adenosine monophosphate, cyclic and tracheal secretion, C327
 tracheal mucosa, C182

J

Junctions
 tight
 ion transport, tracheal mucosa, C182
 mammary, during lactation (mouse), C20
 Juxtaglomerular apparatus, cellular ultrastructure, potassium effects (salamander), C204

K

Kidney
 cortical collecting duct, adenosine triphosphatase activity in, C314
 membranes, photoaffinity labeling, C217
 mitochondria, pH, estimates, C188
 Kidney cells
 epithelial
 DNA synthesis, potassium stimulation of (monkey), C14
 growth regulation by sodium (monkey), C321
 tubular, estimates of cellular pH gradients, C188
 Kidney tubules
 adenosine triphosphatase measurement,

- micromethodology for, C314
- distal, cellular ultrastructure, potassium effects (salamander), C204
- proximal, organic anion transport system, C217
- Kinase, myosin light chain, fast and slow skeletal muscles, C462

L

- Lactate
 - efflux, pH effects, sartorius muscle (frog), C175
 - production, glycolysis regulation and, aorta, C107
- Lactation, electrical potentials during, mammary gland (mouse), C20
- Leucine, uptake, brain, diabetes, C450
- Leukocytes, sodium-hydrogen exchange, amiloride-sensitive, C293
- Liver cells: see Hepatocytes
- Lung cells, bronchiolar Clara, postnatal development, C197
- Lymphocytes, sodium-hydrogen exchange, amiloride-sensitive, C293
- Lysosomes, multivesicular body, bladder (toad), C90

M

- Macrophages, sodium-hydrogen exchange, amiloride-sensitive, C293
- Magnesium-ATPase, measurement, micromethodology for, kidney tubules, C314
- Malate dehydrogenase, levels, adenosine monophosphate, cyclic effects, myotubes, C33
- Mammary gland, electrical potentials, lactation (mouse), C20
- Membrane, ultrastructure and functioning, bladder (toad), C90
- Mercaptodextran, protein and coenzyme A synthesis and, heart, C99
- Metabolic disease, fibroblasts, increased ouabain sensitivity, C415
- Metals, heavy, calcium uptake and, red blood cells, C143
- Methylphosphonate, intracellular pH, single skin (frog), C506
- Microelectrodes, chloride transport, basolateral membrane, gallbladder epithelium (frog), C495
- Micromethodology, measurement of adenosine triphosphatase, kidney tubules, C314
- Microscopy, electron, bladder epithelial cell (toad), C268
- Mineralocorticoids, micromethodology, measurement of adenosine triphosphatase, kidney tubules, C314
- Mitogenes, vasopressin, calcium release and, Swiss 3T3 cells, C156
- Monokines, muramyl dipeptide effects, pyrogen-induced fever, C169
- Mucus
 - secretion
 - adenosine monophosphate, cyclic and, trachea, C327
 - stimulation of, palate epithelium (frog), C299
- Muramyl dipeptide, endogenous pyrogen-induced fever and, C169
- Muscle
 - activation-induced alkaline shifts, transport of hydrogen equivalents (frog), C357

- atrophy, actin synthesis during immobilization, C39
- striated, myofibrillar creatine kinase, C424

- Muscle, skeletal
 - fast and slow, myosin light chain phosphorylation in, C462
 - immobilization, actin synthesis, C39
 - veratridine effects, membrane potential (frog), C309
- Muscle, smooth
 - contractility, aerobic glycolysis separation from, anococcygeus, C342
 - trachea, β -adrenergic receptor in, C335
- vascular
 - glucose uptake, carotid artery (pig), C433
 - glycolysis regulation, C107
- Muscle cells, vascular smooth, sodium ion influx, platelet-derived growth factor and, C501
- Muscle fibers, glycerinated, myofibrillar creatine kinase, C424
- Muscular dystrophy, fibroblasts, increased ouabain sensitivity, C415
- Myotubes, enzyme levels, adenosine monophosphate, cyclic control of, C33

N

- Nephron
 - distal, cellular ultrastructure, potassium effects (salamander), C204
 - proximal, adenosine triphosphatase activity in, C314
- Neuromuscular transmission, aging effects, C288
- Neurons, brain, hypertensive, increased angiotensin II receptors in, C364
- Neutrophils, sodium-hydrogen exchange, amiloride-sensitive, C293
- Nitrosamine, sweat gland, cholinergic stimulation, C228
- Norepinephrine, pyruvate oxidation, myocardial, C45
- Novikoff cell surface, solute-excluded volumes near, C350
- Nuclear magnetic resonance
 - cellular pH gradients, renal tubular cells, C188
 - lactate efflux and, sartorius muscle (frog), C175
- Nucleotides, cyclic
 - β -adrenergic sweat secretion and, sweat glands (horse, donkey), C10
 - enzyme levels and, myotubes, C33

O

- Octylglucoside, adenosine triphosphatase activity and, kidney tubules, C314
- Optical scanning system, solid state, measurement of biomechanical systems, C488
- Osmotic tolerance, granulocytes, C373
- Ouabain
 - aerobic glycolysis, anococcygeus muscle, C342
 - glucose uptake, carotid artery (pig), C433
 - potassium transport, under amphotericin B, cornea (frog), C454
 - sensitivity, fibroblasts from muscular dystrophy, C415
- Oxidative metabolism, separation from glycolysis, anococcygeus muscle, C342

- Oxygen
 - consumption, myocardial, calcium ion stimulation, C45
 - supply, mitochondrial clustering effects, hepatocytes, C83

P

- Palate, epithelium, stimulation of mucus secretion and ciliary activity (frog), C299
- Permeability
 - cells, freezing injury and, C125
 - lactate, extracellular pH effects, sartorius muscle (frog), C175
 - membrane, cadmium and zinc effects, erythrocytes, C143
 - potassium, perilymphatic perfusion of barium effects, cochlear duct, C240
 - potassium transport, under amphotericin B, cornea (frog), C454
 - sodium, veratridine effects, membrane potential of sartorius muscle (frog), C309
- pH
 - cellular gradients, estimates, renal tubular cells, C188
 - extracellular, lactate efflux and, sartorius muscle (frog), C175
 - intracellular, single skin (frog), C506
 - muscle, hydrogen equivalents and (frog), C357
 - regulation, platelets and leukocytes, C293
- Phosphocreatine, intracellular pH, single skin (frog), C506
- Phosphorylation, myosin light chain, fast and slow skeletal muscles, C462
- Photoaffinity, labeling, kidney membranes, C217
- Pituitary cells, cobalt ion inhibition, prolactin secretion, C150
- Placenta, yolk sac, metabolism of transferin and albumin, C409
- Platelets, sodium-hydrogen exchange, amiloride-sensitive, C293
- Polymorphism, HK-LK, erythrocytes (sheep), C120
- Polysomes, RNA degradation, energy dependence of, C390
- Potassium
 - cellular ultrastructure and, distal nephron (salamander), C204
 - DNA synthesis and, kidney epithelial cells (monkey), C14
 - extracellular concentration, kidney epithelial cell growth and, sodium effects (monkey), C321
 - flux ratio, corneal epithelium (frog), C454
 - permeability: see Permeability
 - transport, colon, membrane potential and (turtle), C26
- Potassium ions, extracellular, inotropy, Purkinje fibers, C478
- Potential difference, ion transport, sweat glands, cystic fibrosis, C3
- Potentials
 - electrical, mammary, during lactation (mouse), C20
 - electrochemical, sartorius muscle (frog), C175
 - endocochlear, perilymphatic perfusion of barium effects, C240
 - end-plate, neuromuscular transmission, aging effects, C288

Potentials (*continued*)

- membrane
 - mammary, during lactation (mouse), C20
 - potassium transport and, colon (tur-
tle), C26
 - sodium-sugar coupling stoichiometry
(chick), C74
 - veratridine effects, sartorius muscle
(frog), C309
- transmembrane, inotropy, Purkinje fi-
bers, C478
- Prolactin, secretion, cobalt ion inhibition
of, intracellular locus, C150
- Prostaglandins, calcium interaction, tra-
cheal mucosa, C182
- Protein
 - degradation, cysteine effects, heart, C99
 - spectrin-like, brain membranes (mouse),
C61
 - synthesis, glucose, insulin, and amino
acid effects, adipose tissue, C228
 - transport, proximal tubule, C217
 - turnover, regulation by glucose, insulin,
and amino acids, adipose tissue,
C228
 - uptake, yolk sac placenta, C409
- Protein synthesis
 - coenzyme A synthesis and, cysteine ef-
fects, heart, C99
 - fibroblasts, muscular dystrophy, C415
 - muscle immobilization and, C39
 - RNA degradation, reticulocytes, C390
- Proton, sulfate cotransport, erythrocytes,
C247
- Pump
 - sodium-potassium
 - anococcygeus muscle, C342
 - fibroblasts from muscular dystrophy,
C415
 - heteroimmune antisera (sheep), C120
 - inotropy, Purkinje fibers, C478
 - Purkinje fibers, inotropy, intracellular ac-
tivity of sodium ions, C478
 - Pyruvate dehydrogenase, oxidation, cal-
cium ion stimulation of, heart, C45

R

- Receptors
 - adrenaline, sweat glands (horse, donkey),
C10
 - β -adrenergic, tracheal muscle, C335
 - angiotensin II, neuronal cultures, hyper-
tensive brain, C364
 - insulin, alveolar type II cells, C472
- Red blood cells: *see* Erythrocytes
- Respiration, mitochondrial clustering ef-
fects, oxygen supply, hepatocytes,
C83
- Reticulocytes, RNA degradation, energy
dependence of, C390

Ribonucleic acid

- degradation, energy dependence of, retic-
ulocytes, C390
- messenger, muscle, during immobiliza-
tion, C39
- RNA: *see* Ribonucleic acid

S

- Sartorius muscle
 - lactate efflux from, extracellular pH ef-
fects (frog), C175
 - membrane potential, veratridine effects
(frog), C309
- Skin, single, intracellular pH (frog), C506
- Sodium
 - channels, veratridine effects, sartorius
muscle (frog), C309
 - growth regulation, kidney epithelial cells
(monkey), C321
 - transport, colonic carcinoma, C260
- Sodium-hydrogen exchange, amiloride-sen-
sitive, platelets and leukocytes, C293
- Sodium ions
 - influx, platelet-derived growth factor ef-
fects, smooth muscle cells, C501
 - intracellular activity, during inotropy,
Purkinje fibers, C478
 - transport, platelets and leukocytes, C293
- Sodium potassium, flux ratio, corneal epi-
thelium (frog), C454
- Sodium-potassium-ATPase
 - carbohydrate content, thyroid hormone
effects, C282
 - measurement, micromethodology for,
kidney tubules, C314
- Sodium-potassium pump: *see* Pump
- Soleus muscle, myosin light chain phos-
phorylation, C462
- Spectrin, brain (mouse), C61
- Stoichiometry, sodium-sugar coupling, in-
testinal cells (chick), C74
- Strophanthidin, inotropic effects, Purkinje
fibers, C478
- Submucosal gland, localization of adeno-
sine monophosphate, cyclic, trachea,
C327
- Sulfate, proton cotransport, erythrocytes,
C247
- Sweat glands
 - β -adrenergic sweat secretion, calcium
and cyclic nucleotide effects (horse,
donkey), C10
 - eccrine
 - cholinergic stimulation of, guanosine
monophosphate, cyclic, accumula-
tion, C228
 - ion transport in, cystic fibrosis, C3
 - Swiss 3T3 cells, calcium release, vasopres-
sin stimulation of, C156

T

- Tannic acid, fixation, bladder epithelial
cell, electron-microscopic study,
C268
- Temperature, low, freezing of living cells,
C125
- Tetrodotoxin, inotropic effects, Purkinje fi-
bers, C478
- Theophylline, pyruvate oxidation, myocar-
dial, C45
- Thialysine, ouabain sensitivity, fibroblasts
from muscular dystrophy, C415
- Thyroid hormone
 - angiotensin-converting enzyme activity
and, endothelial cell, C163
 - carbohydrate content and, sodium-potas-
sium-ATPase, C282
- Trachea
 - epithelial cells, physiological responsive-
ness, C441
 - localization of adenosine monophos-
phate, cyclic, C327
- Trachealis muscle, β -adrenergic receptor
in, C335
- Tracheal mucosa, ion transport, calcium
and prostaglandin interaction, C182
- Transferrin, uptake of metabolism, yolk
sac placenta, C409
- Tyrosine, uptake, brain, diabetes, C450

U

- Undernutrition: *see* Feeding
- Urinary bladder
 - aggregate-carrying membrane in (toad),
C90
 - epithelial cell electron microscopic study
(toad), C268

V

- Vasopressin: *see also* Antidiuretic hormone
- calcium release and, Swiss 3T3 cells,
C156
- growth regulation, kidney epithelial cells
(monkey), C321
- Veratridine, membrane potential and, sar-
torius muscle (frog), C309
- Video system, solid state, measurement of
biomechanical systems, C488
- Volume, solute-excluded, Novikoff cell sur-
face, C350

W

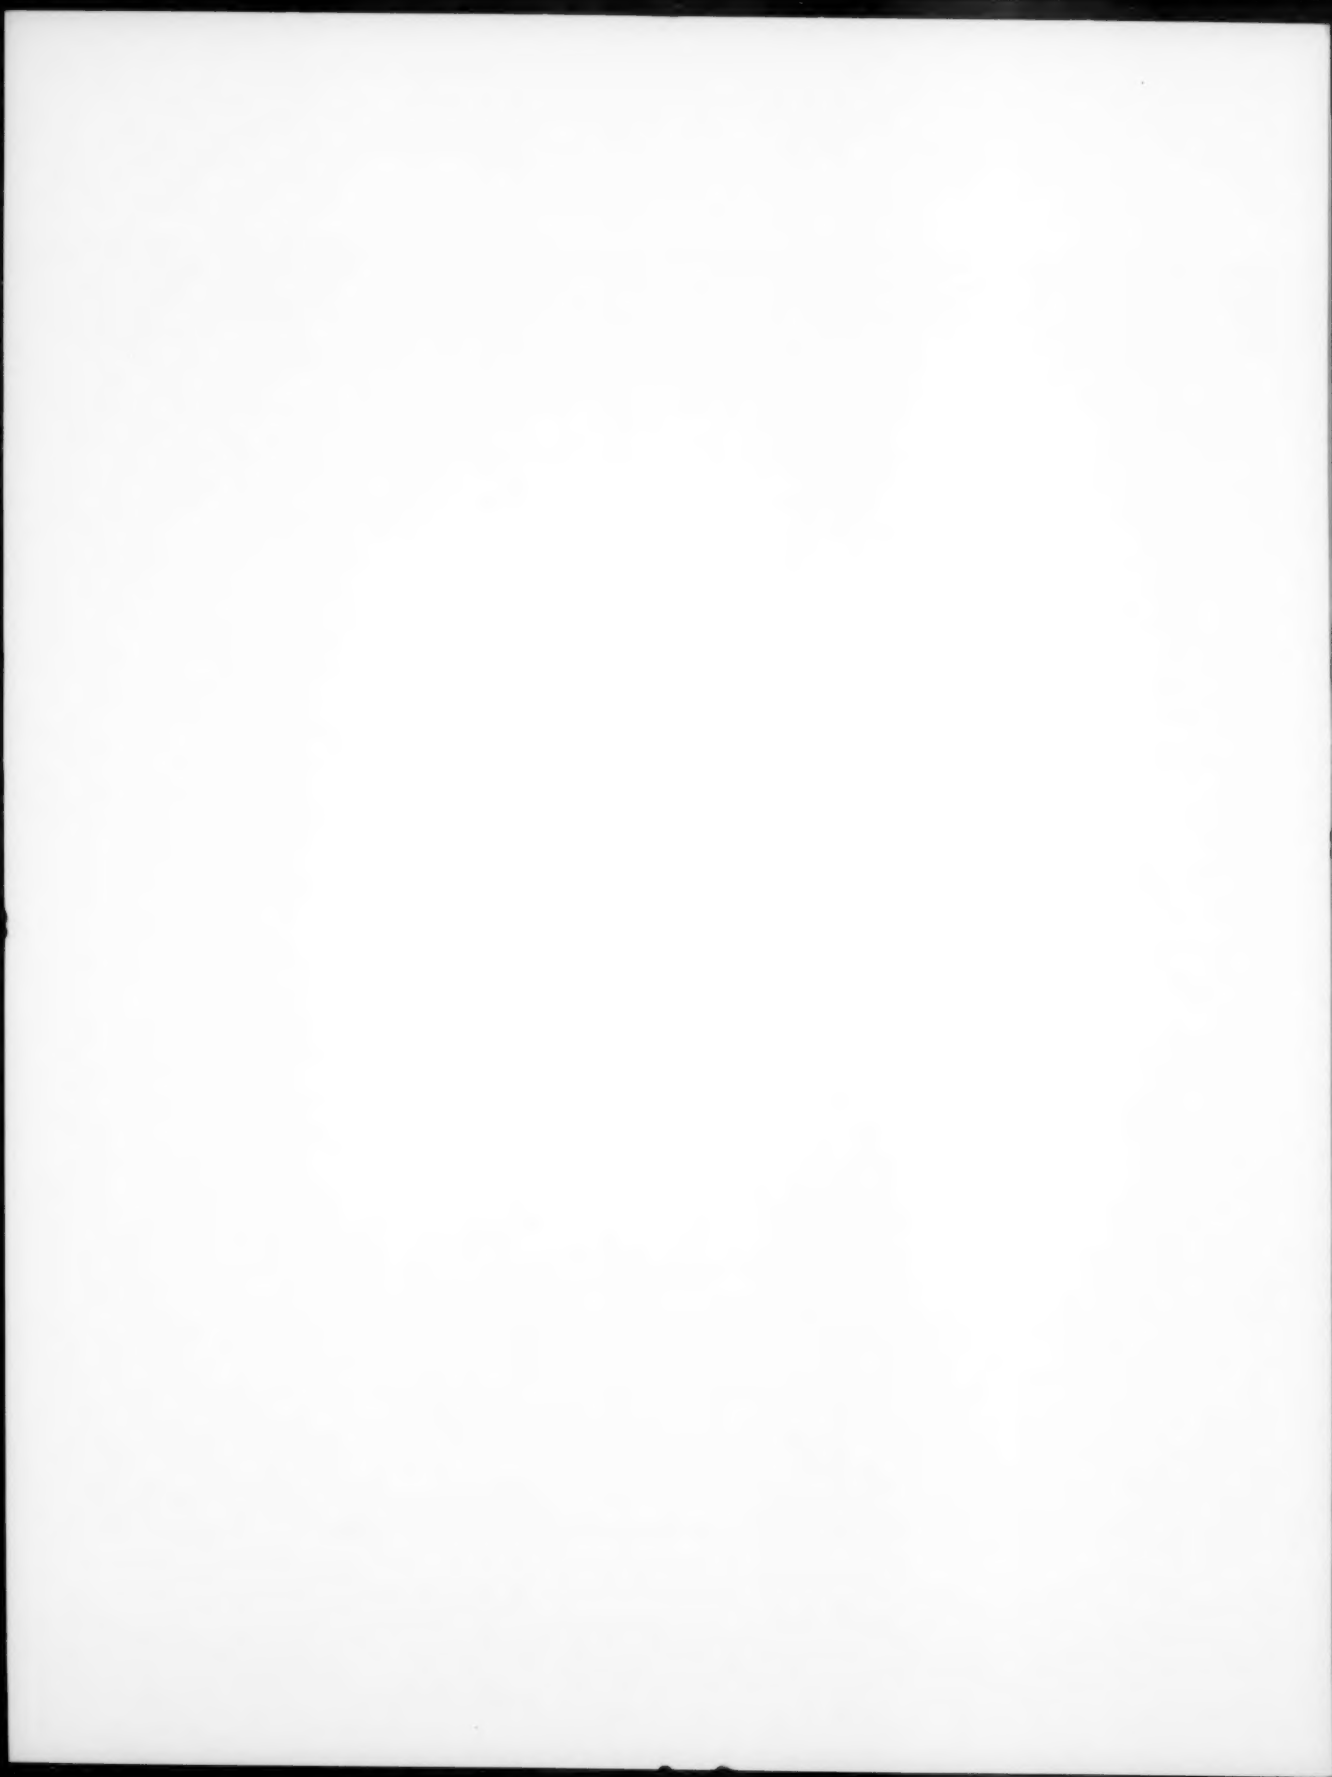

- Water, cell, behavior, freezing and, C125
- White blood cells: *see* Leukocytes

Z

- Zinc, calcium uptake and, red blood cells,
C143

American Journal of Physiology: Cell Physiology

No. 1 JULY 1984

EDITORIAL

Traditions and new trends in cell physiology

P. A. Knauf

C1

Influence of abnormal Cl^- impermeability on sweating in cystic fibrosis

J. Bijman and P. M. Quinton

C3

Influence of calcium and cyclic nucleotides on β -adrenergic sweat secretion in equine sweat glands

J. Bijman and P. M. Quinton

C10

Stimulation of DNA synthesis in kidney epithelial cells in culture by potassium

F. G. Toback, K. B. Ekelman, and N. G. Ordóñez

C14

Electrical potentials and cell-to-cell dye movement in mouse mammary gland during lactation

S. E. Berga

C20

Control of potassium transport by turtle colon: role of membrane potential

D. R. Halm and D. C. Dawson

C26

Evidence that levels of malate dehydrogenase and fumarase are increased by cAMP in rat myotubes

J. C. Lawrence, Jr. and W. J. Salzgiver

C33

Changes in actin synthesis and α -actin-mRNA content in rat muscle during immobilization

P. A. Watson, J. P. Stein, and F. W. Booth

C39

Parallel stimulation by Ca^{2+} of inotropism and pyruvate dehydrogenase in perfused heart

R. Bünger and B. Permanetter

C45

Chloride transport properties of human leukemic cell lines K562 and HL60

S. Dissing, R. Hoffman, M. J. Murnane, and J. F. Hoffman

C53

A spectrin-like protein from mouse brain membranes: phosphorylation of the 235,000-dalton subunit

S. R. Goodman, I. S. Zagon, C. F. Whitfield, L. A. Casoria, S. B. Shohet, S. E. Bernstein, P. J. McLaughlin, and T. L. Laskiewicz

C61

Sodium-sugar coupling stoichiometry in chick intestinal cells

G. A. Kimmich and J. Randles

C74

Effect of mitochondrial clustering on O_2 supply in hepatocytes

D. P. Jones

C83

Aggregate-carrying membranes during ADH stimulation and washout in toad bladder

J. Muller and W. A. Kachadorian

C90

Differential effects of cysteine on protein and coenzyme A synthesis in rat heart

B. H. Chua, K. E. Giger, B. J. Kleinhans, J. D. Robishaw, and H. E. Morgan

C99

Regulation of glycolysis in rat aorta

H. Kutchai and L. M. Geddis

C107

RAPID COMMUNICATIONS

Angiotensin II in neuronal cultures from brains of normotensive and hypertensive rats

M. K. Raizada, B. Stenstrom, M. I. Phillips, and C. Sumners

C115

Stimulation of Na^+ - K^+ pump in sheep red blood cells by heteroimmune anti-sheep red cell antibodies

P. B. Dunham, B. E. Farquharson, and R. L. Bratcher

C120

ANNOUNCEMENTS

C124

BRIEF REVIEW

- Freezing of living cells: mechanisms and implications
P. Mazur C125
-
- Effects of cadmium and zinc on calcium uptake in human red blood cells
G. A. Plishker C143
- Evidence that cobalt ion inhibition of prolactin secretion occurs at an intracellular locus
C. N. Thaw, E. G. Raaka, and M. C. Gershengorn C150
- Vasopressin rapidly stimulates Ca^{2+} efflux from intracellular pool in quiescent Swiss 3T3 cells
A. Lopez-Rivas and E. Rozengurt C156
- Hormonal influence on endothelial cell angiotensin-converting enzyme activity
A. H. Krulewitz, W. E. Baur, and B. L. Fanburg C163
- Inhibition of endogenous pyrogen-induced fever by a muramyl dipeptide derivative
M. Parant, G. Riveau, F. Parant, and L. Chedid C169
- Effects of extracellular pH on lactate efflux from frog sartorius muscle
Y. Seo C175
- Ion transport in dog tracheal mucosa: interaction between calcium and prostaglandins
F. J. Al-Bazzaz and V. P. Yadava C182
- Estimation of cellular pH gradients with ^{31}P -NMR in intact rabbit renal tubular cells
S. Adler, E. Shoubridge, and G. K. Radda C188
- Postnatal development of the bronchiolar Clara cell in rats
G. D. Massaro, L. Davis, and D. Massaro C197
- Cellular ultrastructure of *Amphiuma* distal nephron: effects of exposure to potassium
B. Stanton, D. Biemesderfer, D. Stetson, M. Kashgarian, and G. Giebisch C204
- Photoaffinity labeling of organic anion transport system in proximal tubule
J. M. Goldinger, B. D. S. Khalsa, and S. K. Hong C217
- Regulation of protein turnover by glucose, insulin, and amino acids in adipose tissue
M. E. Tischler, A. H. Ost, B. Spina, P. H. Cook, and J. Coffman C228
- Cyclic GMP accumulation during cholinergic stimulation of eccrine sweat glands
K. Sato and F. Sato C234
- Characterization of potassium permeability of cochlear duct by perilymphatic perfusion of barium
D. C. Marcus C240
- Proton-sulfate cotransport: external proton activation of sulfate influx into human red blood cells
M. A. Milanick and R. B. Gunn C247
- Epithelial properties of human colonic carcinoma cell line Caco-2: electrical parameters
E. Grasset, M. Pinto, E. Dussaulx, A. Zweibaum, and J.-F. Desjeux C260
- Electron-microscopic study of the apical region of the toad bladder epithelial cell
J. Sasaki, S. Tilles, J. Condeelis, J. Carboni, L. Meiteles, N. Franki, R. Bolon, C. Robertson, and R. M. Hays C268
- Effect of thyroid hormone on carbohydrate content of $\text{Na}^+\text{-K}^+$ -adenosine triphosphatase
C. S. Lo, L. E. Klein, and T. N. Lo C282
- Age-associated changes in neuromuscular transmission in the rat
D. F. Wilson and R. C. Cardaman C288

RAPID COMMUNICATIONS

- Amiloride-sensitive $\text{Na}^+\text{-H}^+$ exchange in platelets and leukocytes: detection by electronic cell sizing
S. Grinstein, J. D. Goetz, W. Furuya, A. Rothstein, and E. W. Gelfand C293

Stimulation of mucus secretion, ciliary activity, and transport in frog palate epithelium <i>B. Spungin and A. Silberberg</i>	C299
Effect of veratridine on membrane potential of sartorius muscle from <i>Rana pipiens</i> <i>L. C. McKinney</i>	C309
Micromethodology for measuring of ATPase activity in renal tubules: mineralocorticoid influence <i>R. G. O'Neil and W. P. Dubinsky</i>	C314
Na regulates growth of kidney epithelial cells induced by lowering extracellular K concentration <i>M. M. Walsh-Reitz, H. N. Aithal, and F. G. Toback</i>	C321
Localization of cAMP in dog and cat trachea: effects of β -adrenergic agonists <i>S. C. Lazarus, C. B. Basbaum, and W. M. Gold</i>	C327
Separation of aerobic glycolysis from oxidative metabolism and contractility in rat anococcygeus muscle <i>S. Davidheiser, J. Joseph, and R. E. Davies</i>	C335
Characterization of a β -adrenergic receptor in porcine trachealis muscle <i>K. J. Popovich, C. Hiller, A. Hough, J. S. Norris, and L. E. Cornett</i>	C342
Solute-excluded volumes near the Novikoff cell surface <i>T. G. Polefka, R. A. Garrick, W. R. Redwood, N. I. Swislocki, and F. P. Chinard</i>	C350
Involvement of transport of H^+ equivalents in activation-induced alkaline shift in frog muscle <i>R. J. Connett, E. T. Hays, and E. N. Gilda</i>	C357
Increased angiotensin II receptors in neuronal cultures from hypertensive rat brain <i>M. K. Raizada, T. F. Muther, and C. Sumners</i>	C364
Osmotic tolerance of human granulocytes <i>W. J. Armitage and P. Mazur</i>	C373
Toxic and osmotic effects of glycerol on human granulocytes <i>W. J. Armitage and P. Mazur</i>	C382
Energy dependence of RNA degradation in rabbit reticulocytes <i>E. A. Park and H. E. Morgan</i>	C390
Measurement of cytosolic free calcium in mammalian cells with aequorin <i>K. W. Snowdowne and A. B. Borle</i>	C396
Uptake and metabolism of transferrin and albumin by rat yolk sac placenta <i>H. J. McArdle and P. K. Priscott</i>	C409
Increased ouabain sensitivity of cultured human fibroblasts from muscular dystrophy <i>M. L. S. Ledbetter</i>	C415
Myofibrillar end of the creatine phosphate energy shuttle <i>F. Savabi, P. J. Geiger, and S. P. Bessman</i>	C424
Glucose uptake in porcine carotid artery: relation to alterations in active Na^+-K^+ transport <i>R. M. Lynch and R. J. Paul</i>	C433
Physiological responsiveness of isolated rabbit tracheal epithelial cells <i>C. M. Liedtke and B. Tandler</i>	C441
Uptake of tyrosine and leucine in vivo by brain of diabetic and control rats <i>J. T. Brosnan, R. G. P. Forsey, and M. E. Brosnan</i>	C450
Amphotericin B-induced active transport of K^+ and the Na^+-K^+ flux ratio in frog corneal epithelium <i>O. A. Candia, P. S. Reinach, and L. Alvarez</i>	C454
Myosin light chain phosphorylation in fast and slow skeletal muscles in situ <i>R. L. Moore and J. T. Stull</i>	C462
Insulin binding and effects on glucose and transepithelial transport by alveolar type II cells <i>K. Sugahara, G. R. Freidenberg, and R. J. Mason</i>	C472

- Quantitative relation of twitch and tonic tensions to intracellular
Na⁺ activity in cardiac Purkinje fibers
W.-B. Im and C. O. Lee

C478
